EDUCATION

University of Warwick

Bachelor of Science (with Honours): Computer Science

Warwick, UK

2025 – Current

- Average Grade: 71.1% (First Class)

Monks Walk, Welwyn Garden City

Hertfordshire, UK

Secondary Education

2018 – 2025

- A-Levels: Computer Science (A*), Physics (A*), Mathematics (A)
- 10 GCSEs: Grades 7-9 including Computer Science and Mathematics

WORK EXPERIENCE

Splunk

London, UK

Software Engineer

Aug 2024

- Collaborated within a Scrum-based software engineering team on a live commercial project, contributing to sprint planning, stand-ups, and code review discussions throughout the SDLC
- Independently deployed and configured a standalone Splunk Enterprise instance, ingesting and indexing over 159,000 log events across multiple source types to explore real-world applications in IT operations and security monitoring
- Used SPL (Splunk's search language) to query, aggregate, and visualise the data, building a multi-panel dashboard covering web traffic and authentication activity

ServiceNow

London, UK

Technical Consultant

Jul 2024

- Built working knowledge of core ServiceNow platform architecture, including ITSM, CMDB, and NowAssist GenAI
- Developed and tested Client Scripts (JavaScript), Business Rules (JavaScript), and UI Policies in sub-production developer instances
- Supported enterprise ServiceNow deployments through platform configuration and requirements gathering, in addition to participating in Agile sprint ceremonies under the NowCreate methodology

Morningstar

London, UK

Software Engineer

Jun 2021

- Engineered and debugged a Python script that queried a company database to automate dataset generation, streamlining statistical analysis for other departments
- Participated in daily standups and sprint planning, gaining hands-on exposure to Agile implementation methodologies through the use of JIRA to plan, track, and deliver work efficiently

EXTRACURRICULAR

Brocket Hall

Hertfordshire, UK

Front of House

May 2026 – Current

- Lead and supported events with consistently over 100 people such as weddings, corporate events and funeral wakes in a diverse range of roles including bar, food running and taking orders to a high-end service standard
- Running the clubhouse in short stints to support the kitchen, bar and food running for a smooth operation and delivery

PROJECTS

- Developed a Robot Maze Controller using **Java**, demonstrating algorithmic logic via stack-based backtracking
- Designed and built a Fitness Website to compute macronutrients, store meals and provide nutritional data using **HTML**, **CSS**, **JavaScript**, and **Python (Flask)**, integrating front-end and back-end functionality
- Created a Flappy Bird-style game using **Unity (C#)** to explore graphical interfaces, object-oriented programming, and game logic
- Developed an Arcade Game using **Python (Pygame)** to implement event-driven programming and interactive graphics
- Designed and implemented algorithms in **Java** utilising **Gradle** to efficiently store, search, sort and process movie data using structures such as linked lists and hash tables
- Built DFAs and NFAs in **Python** to recognise and validate strings in a Natural Deduction Language (NDL), applying formal automata theory to a working language-recognition system

SKILLS & INTERESTS

Technical Skills: Python, Java, HTML/CSS, JavaScript, C#, SQL

Frameworks & Tools: Flask, Unity, Gradle, Git/Github, Splunk (SPL), ServiceNow Platform

Leadership/Volunteering: St Albans Youth Talk (Fundraising), Leading local litter-picking team, Mentoring and Teaching BBC Micro bits, Duke of Edinburgh Bronze

Sports & Hobbies: Cricket, Jeet Kune Do (JKD London), Golf (Handicap 26), 5-a-side active leagues (Football), Squash (Warwick Squash Society), Warwick Computing Society

Driving Licence: Full UK Driving Licence
